

Reduced inequality.

10 INÉGALITÉS RÉDUITES

Ambassador of SDG 10:

Fadhila Darragi: Vice President in charge of Programs, Training and Professional Integration.
University of Tunis El Manar

Inclusive training courses

One of the special features of the University of Tunis El Manar is that it offers two academic and inclusive courses:

- **A degree in Physiotherapy** for the visually impaired and blind, taught at the Tunis School of Health Sciences and Techniques (Ecole de Santé)

A visually impaired teacher with a class of visually impaired and blind students.

- **A degree in Sign Language** taught at the Institut Supérieur des Sciences Humaines in Tunis.

Our events are translated into sign language by lecturers or students at the University of Tunis el Manar.

Announcements of student cultural events are also translated into Sign Language

<https://fb.watch/njMj0NiGI-/>

Sometimes we call on our blind students to announce a cultural event.

ERASMUS+ PROJECT

The University Of Tunis El Manar is a partner in an ERASMUS+ project INSIDE.

InSIDE (Including Students with Impairments in Distance Education) is a Capacity Building in Higher Education (Erasmus+) project that aims at developing accessible, inclusive and educationally effective Distance Education (DE) programmes for individuals with Visual, Hearing and Mobility (ViHeMo) impairments through a user-centred design. DE programmes will be structured on 3 axes: a) educational material, b) DE delivery system, and c) educational effectiveness / pedagogical approaches. Eleven universities from Maghreb – 4 from Morocco, 4 from Algeria and 3 from Tunisia – will be trained by University of Macedonia (leading institution – Greece), National and Kapodistrian University of Athens (Greece) and Johannes Kepler University (Austria), and will implement the DE programmes at hand. These programmes will deliver key competences for vocational rehabilitation, and will provide opportunities for lifelong learning, skills enhancement, and personal fulfillment with the ultimate

Aim of suggesting an intelligent solution against the problems of limited access or high percentage of dropouts in Higher Education in individuals with impairments.

As part of this project, able-bodied and blind or partially sighted teachers provided training for around thirty teachers from the UTM. The training focused on integrating disabled students into the classroom and teaching methods.

Thanks to this INSIDE project, the “Ecole Supérieure des Sciences et Techniques de la Santé” has received equipment for teaching students with physical, hearing and visual disabilities.

HANDISPORT: SPORTS FESTIVAL DISCOVERY DAY

(15 March 2023)

The University of Tunis El Manar, in partnership with the Federation of Sports for the Disabled, organized a day to discover disabled sport.

Why a discovery day?

- 1) For disabled students discovering their adapted sport
- 2) For able-bodied students to discover disabled sport
- 3) Disabled sport will be a compulsory part of the next University Sports Festival.

Football for the hearing impaired: able-bodied students had their ears plugged.

Able-bodied students took part in the wheelchair match

Able-bodies students were blindfolded

UTM UNIVERSITY WITHOUT OBSTACLES 2ND ISSUE

The event took place over 4 days from 26 to 29 May 2023 in collaboration with the International Centre for the Advancement of People with Disabilities, with the slogan "Handi-Capables towards Excellence".

This event aims to help integrate people with disabilities into the socio-economic environment by promoting their training and their creative ideas (projects, start-ups, etc.)

The presence of disabled people was significant among teachers and students

A two-day stay at the International Centre for the Advancement of People with Disabilities for disabled students was a very successful experience in terms of communication between them. They took an interest in several workshops (painting, theatre, jewellery making).

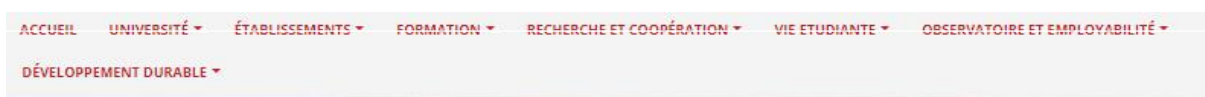

Communication for dance is through touch

WEBSITE AND MEDIA

UNIVERSITÉ INCLUSIVE

<http://www.utm.rnu.tn/utm/fr/universite--universite-inclusive>

<https://fb.watch/njUCaccuAB/>

Our disabled students took part in a Radio Jeune called "La voix des étudiants". This is the first time that a radio station has produced a program with disabled people.

INTERNATIONAL STUDENTS

"L'Université de Tunis El Manar Phare des Cultures" is a cultural event organised by the University of Tunis El Manar in its first edition on 26 October 2022 to present the cultural heritage of the participating countries through exhibitions and artistic performances presented by students who reflect their vision of their different cultural traditions and values.

Parade of traditional costumes
